ELSEVIER

Respiration Physiology 116 (1999) 213–214

Subject index of volume 116

Airflow
  bronchi, external diameter, 67
Airways
  bronchial diameter, flow, 67
Alveolar fluid
  Na^+ adsorption, 1
Amphibian
  frog, 171
  South African clawed frog (*Xenopus laevis*), 1
Anoxia
  gasping, 47

Bacteria
  Streptococcus pneumoniae, 201
Bladder
  urinary, spontaneous contraction, inspiratory activity, 105
Bronchi
  constriction, airflow, 67

Carbon dioxide
  $^{13}C/^{12}C$ fractionation, exercise, 77
Cardiorespiratory control
  hypoxia, 181
Chemoreceptors
  O_2, fish gills, 181
Control of breathing
  apnea, nicotine, 145
  arcuate nucleus, 133
  gasping, eupnea, 47
  Hering–Breuer reflex, peripheral nerve stimulation, 25
  hypercapnic response, central pathways, 125
  laryngeal chemoreflex apnea, 35
  pharyngeal constrictor muscle activity, 9
  pulmonary afferents, 115

Development
  newborn rabbit, 25
  postnatal, chemoreflexes, 35
  ventilatory control, lung, 95

Enzymes
  NO synthase, 159
  xanthine oxidase, 201
Epithelium
  alveolar, Na^+ adsorption, 1

Equipment
  radiotelemetry, 85
Exercise
  CO_2 fractionation, 77

Fish
  Traira (*Hoplias malabaricus*), 181

Gas exchange
  CO_2 fractionation, 77
Gasping
  medullary neurons, 47
Gill
  chemosensitive receptors, 181

Heterogeneity
  pulmonary blood flow, NO, 159
Hibernation
  anaerobic metabolism, 171
Hypercapnia
  pharyngeal muscles, 9
Hypothalamus
  arcuate nucleus, non-NMDA receptors, 133
Hypoxia
  hibernation, 171
  hypometabolism, thermoregulation, 95
  laryngeal chemoreflex apnea, 35
  pharyngeal muscles, 9

Infection
  gastric juice, streptococcus, pneumonia, 201
Irritants
  wood smoke, pulmonary afferents, 115

Lactic acid
  shuttle, hypoxic hibernation, 171

Mammals
  cat, 47, 145, 159
  goat, 9
  humans, 77
  lamb, 35, 85
  mouse, 201

PII: S0034-5687(99)00067-5

newborns, 95
pig, 67
piglet, 125
rat, 115, 133
Mediators
NO, 159
Medulla
rostral, respiratory neurons, 47
Metabolisim
anaerobic, hibernating, 171
Metabolite
^{13}C-labeled glucose, 77
Muscles
pharyngeal constrictor, 9

Na^+
epithelial channel, 1
Nerves
inspiratory motor, spontaneous bladder contraction, 105
saphenous, control of breathing, 25

Oxygen
receptors, fish, 181

Pattern of breathing
arcuate nucleus, 133
hypercapnia, 125
Pharmacological agents
bicuculline, 125
CNQX, 133
nicotine, 145
NOS inhibitors, 159
terbutaline, 1
Pharynx
muscle activity, 9

Pulmonary afferents
C-fibers, irritant fibers, wood smoke, 115
Pulmonary circulation
regional vasodilation, 159

Receptors
$GABA_A$, 125
non-NMDA, arcuate nucleus, 133
Respiratory muscles
rib cage, intravenous nicotine, 145

Sleep
monitoring, unrestrained lambs, 85

Techniques
unrestrained polysomnography, 85
Temperature
body, hypoxia, 95
Thermoregulation
hypoxia, 95

Upper airways
irritant receptors, 115
laryngeal receptors, 35
pharyngeal constrictor muscle, 9

Vagus nerve
somatic nerve stimulation, 25
Ventilation
intravenous nicotine, 145
